Publishing Web UI

Prior to STEP 8.2, users could choose between a number of Web UI templates when creating a Web UI. While these templates are now legacy functionality and not applicable to STEP 8.2+ systems, the information in the sample Web UI topics may benefit current users.

Refer to the Web User Interfaces topic for more information on Web UI functionality, which may not be reflected in this topic / section.

Note: Supported versions of Adobe InDesign are InDesign 2025 (v. 20) and CC 2024 (v. 19). Future InDesign support / desupport information, if applicable, can be found in the update-specific STEP Client Requirements topics in the System Update and Patch Notes documentation.

Introduction

The purpose of a Publishing Web UI is to enable users to generate JPEG and PDF proofs of products and review publications. This can be done for an individual product (using the Proof View component) or for a selection of products to form a publication (using the Print on Demand component).

A Publishing Web UI also supports Publication Excel imports, side-by-side comparison of page revisions, and limited Print Flatplanner functionality.

The following are the main areas of functionality within a Publishing Web UI:

- Print on Demand
- Print Actual Page Viewer
- Planned Page Viewer from the Page Revision Comparisons topic
- Print Proof View
- Page Revision Comparisons
- Publication Excel import from the Page Revision Comparisons topic
- Commercial data from the Working with Commercial Data in the Publishing Web UI topic

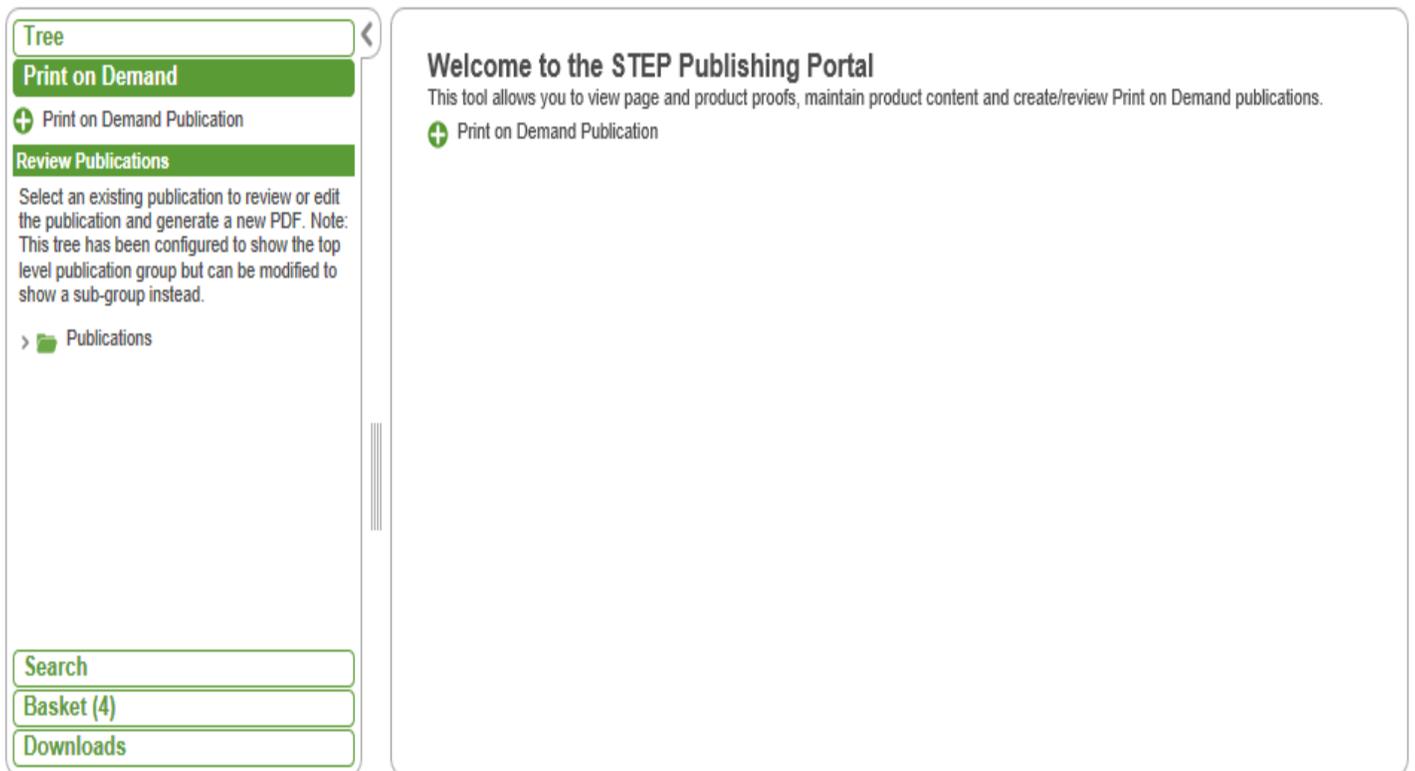

Proof View is documented in the Publisher (Adobe InDesign Integration) documentation in the Print Proof View topic.

Publication Excel imports are documented in the Publisher (Adobe InDesign Integration) documentation in the Importing Publications in Excel topic.

Print on Demand

To access the Print on Demand functionality, select the Print on Demand tab in the left hand side panel. You can create a new Print on Demand publication by selecting the '+' icon. Existing publications can be reviewed by selecting them in the Review Publications tree.

EN All All ▾ Main ▾ My Settings Logout

The screenshot shows the 'STEP Publishing Portal' interface. On the left, a sidebar titled 'Tree' contains the following elements:

- Print on Demand** (selected tab)
- + Print on Demand Publication
- Review Publications**
- Select an existing publication to review or edit the publication and generate a new PDF. Note: This tree has been configured to show the top level publication group but can be modified to show a sub-group instead.
- > Publications
- Search

Brochure

Flyer

Next

In this step of the wizard, you must specify a Publication Name for your new publication, specify a page number for the publication to start on and select a Template to base the publication on. A template can be selected by either using the template selection dropdown menu or by selecting from the template thumbnails. The template selection dropdown supports selection of the template by typing the first few letters of the template name.

Once a Publication Name and Template have been specified, the 'Next' button will become enabled. Pressing this will take you to the Next step of the wizard.

Next

In this step of the wizard, you can add or remove items from your publication and change the order in which they will be paginated.

Selecting 'Add Items' pops up a node chooser to allow you to browse or search for the Products, Assets or Classifications to add to the publication. Multiple items can be added at the same time by using either Ctrl-click or Shift-click in the Browse tree.

Items can be removed from the list to be paginated by selecting item(s) from the item list and then selecting 'Remove Items.'

To change the order of the items in the pagination list, select the items to move up or down the list and then select 'Move Up' or 'Move Down.'

Once items have been added to your publication, the 'Next' button will become enabled. Pressing this will take you to the next step of the wizard.

To go back to the previous stage of the wizard, press the 'Back' button.

Get PDF

Save & Finish

Finish

In this step of the wizard you can review the publication, retrieve a PDF of the publication and save it.

© Stibo Systems - Public - 2025.4 - December 2025

12

To review a page of the publication, choose a version to review from the Version dropdown and then choose a page to review by either typing a page number into the page number field or using the left and right arrow page navigator icons or selecting the page thumbnail in the left hand column. A JPEG of the selected page is shown on the right hand side of the screen. This preview can be zoomed in and out by placing the cursor over the image and scrolling the mouse wheel.

To retrieve a PDF of the publication, select the 'Get PDF' button.

The publication can be saved by selecting the 'Save & Finish' button or can be discarded by selecting the 'Finish' button. Selecting 'Save & Finish' will display a tree browser from which the user can select where in the publication hierarchy to save the publication. Pressing either of the 'Save & Finish' or the 'Finish' button will take the user back to the portal home page.

To go back to the previous stage of the wizard, press the 'Back' button.

From the Review Publications section of the Print on Demand tree, browse to the publication to review and select it. This will display the publication in Step 3 (Review Publication) of the Print on Demand wizard.

Choose to 'Get PDF' for the publication which will retrieve a PDF of the publication or you can modify the publication by choosing the 'Back' button to take you to the previous steps of the wizard. The 'Save and Finish' will save any changes that have been made to the publication and take the user back to the portal home page.

Creating a New Print on Demand Publication based on an Existing Publication

Selecting an existing publication to review and then selecting the '+' icon to create a new Print on Demand Publication will pre-populate the item collection in Step 2 'Manage Products' of the Create New Publication wizard with the items that were in the originally selected existing publication. This allows the user to create a new publication based on an existing publication.

Print on Demand Configuration Options

The Print on Demand Web UI has various configuration options that are available in the Web UI designer. The key configuration options are listed. View the Print On Demand Web UI in design mode for further options.

Email PDF to User

If set, selecting 'Get PDF' will email the PDF to the user instead of returning it directly to the browser. The default setting is to return the PDF directly to the user.

Show Review Publication Wizard Step

This controls whether Step '3 Review Publication' is shown as part of the Print on Demand wizard.

Show Template Previews

This controls whether Template Previews are shown in Step '1 Set Publication Options' of the Print on Demand wizard.

Print Actual Page Viewer

To access the Actual Page View functionality, from the Tree on the left hand side, select a DTP document from within a publication.

The screenshot displays the 'Print Actual Page Viewer' interface. On the left is a 'Tree' navigation pane showing a hierarchy from 'Image Hierarchy' down to 'Print on Demand'. The main area is titled 'DTP Document' and shows a preview of a product catalog page. The catalog includes several product entries, each with an image, a title, a description, and a table of specifications. The products shown are:

- Möbelhjul dubbellänkhjul typ KP** (Furniture casters with double rollers)
- Länkhjul typ AO 36** (Furniture casters)
- Plasthjul fasthjul typ FFR 86** (Plastic fixed casters)
- Ottomanhjul typ FWR** (Office casters)

At the bottom of the interface, there is a table listing the products and their attributes:

ID	Name	Spaced Used
BBtool_BB5457	Ottomanhjul typ FWR	4885.16 mm ²
BBtool_BB5470	Plasthjul fasthjul typ FFR 86	3562.14 mm ²
BBtool_BB5487	Möbelhjul dubbellänkhjul typ KP	4136.89 mm ²
BBtool_BB5492	Länkhjul typ AO 36	7647.19 mm ²
BBtool_TT116130105	116130105	190.43 mm ²
BBtool_TT116130204	116130204	197.31 mm ²
BBtool_TT116130303	116130303	197.31 mm ²
BBtool_TT116130402	116130402	197.31 mm ²
BBtool_TT116150707	116150707	201.83 mm ²
BBtool_TT116150806	116150806	201.83 mm ²
BBtool_TT56540305	56540305	193.49 mm ²

To review an actual page of the publication, choose a version to review from the Version dropdown and then choose a page to review by either typing a page number into the page number field or using the left and right arrow page navigator icons or selecting the page thumbnail in the left hand column. A JPEG of the selected page is shown on the right hand side of the screen. This preview can be zoomed in and out by placing the cursor over the image and scrolling the mouse wheel.

Selecting the Products, Assets or Notes tab at the bottom of the screen will show more information about the content mounted on the actual page. From each of these tabs, selecting an entry in the table will highlight the selected content on the page.

Page Revision Comparisons

The Publishing Web UI supports Revision Compare functionality for both actual pages and Flatplanner planned page spreads. This allows users to easily compare page revisions by highlighting where changes have occurred.

Revision Compare Toolbar

The 'Revision Compare' toolbar enables viewing of the latest page revision on the left half of the screen and a previous revision on the right. The previous revision to compare to can be selected from the 'Previous Revision' dropdown and differences can be highlighted by selecting the 'Show Differences' checkbox. This will result in the differences being highlighted on the latest revision while areas that have not changed are grayed out.

Publication

Details **Proof** Plan Autopage Planner Print On Demand

English US

Current Revision: 6/30/15 9:49:00 AM

Previous Revision: 5/19/15 2:03:03 PM Show Differences

The system determines the differences between the two pages by looking at textual content changes and differences in space usage data. Text changes are highlighted whether the changes are made 'freehand' on mounted pages or if they originate from attribute value changes in STEP.

The Revision Compare functionality is available in the Publishing Web UI in the following components:

- Actual Page Revision Compare Proof
- Planned Spread Revision Compare Proof
- Planned Spread Revision Compare In Workflow

The Show Revision Toolbar option must be checked to enable the new functionality. If the box is not checked, the Revision Toolbar is not displayed and only the most recent page revision is visible.

Configuring Revision Compare Functionality on Actual Page

Adding a New Actual Page Screen

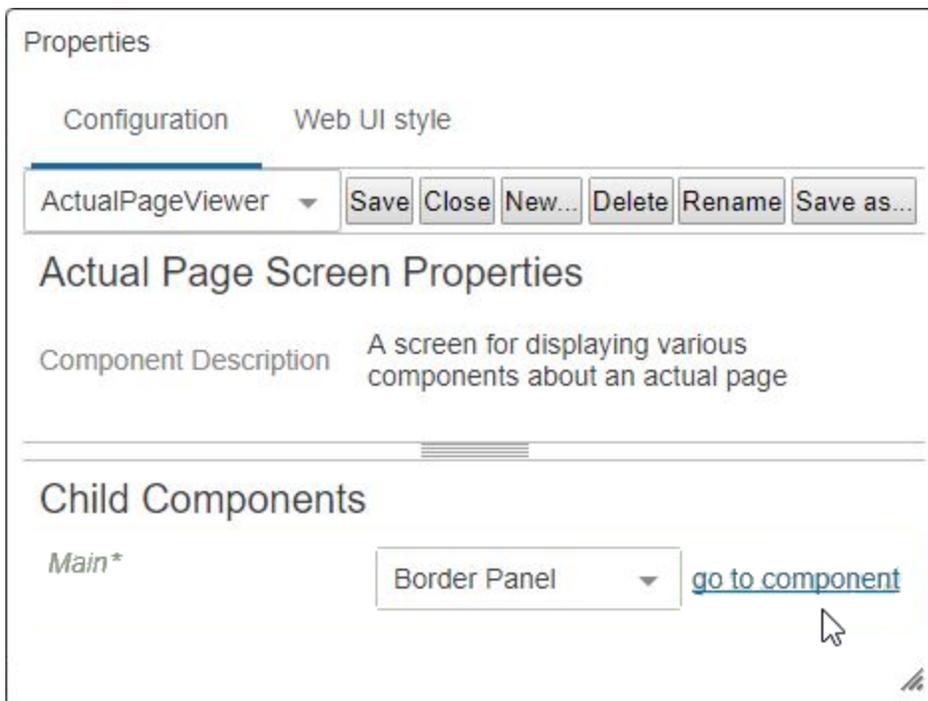

To add a new Actual Page screen type, follow the steps below:

1. In the designer, click the **New** button in the action icon row.
2. Choose **Actual Page Screen** from the screen list and type in a Screen ID. The screen ID should be something easily identifiable when it is time to configure the screen and/or set up screen mapping.
3. Click **Add**.

Configuring Actual Page Screen Properties

Once the screen has been added, follow the steps below to configure the Actual Page Screen Properties.

1. On the Actual Page Screen Properties go to Child Components > Main > Border Panel > click on **go to component**.

2. In the Border Panel Properties, go to Child Components > Main > Actual Page Revision Compare Proof > click on **go to component**.
3. On the **Actual Page Revision Compare Proof Properties**, there are a number of fields that can be filled out.

- In the Actual Page Navigator Properties for the Page Selection Screen field, select the Actual Page Screen created in the previous step.

- Select the Hide Navigation checkbox if the Navigation panel is not required.
- Click the Save button in the designer.
- Click Close the designer when finished.

Considerations and Limitations

- Planned pages must be mounted in InDesign and saved back to STEP before the Revision Compare functionality is enabled. Content changes to unmounted planned pages, e.g., replacing the content of a Flatplan frame, will not be highlighted as revisions.
- Users who have both a Print Flatplanner and Web UI license may compare revisions of mounted pages both from the Planned Spread Navigator and from the Actual Page Navigator in the Web UI. Users with a standard Print Publisher (STEP'n'design) license can compare revisions of mounted pages from the Actual Page Navigator only.

- Though the Revision Compare feature highlights changes in textual content, this feature is primarily designed to highlight differences in space usage between the two revisions. It does not highlight changes in images, frame colors, paragraph styles, or layouts if the space usage remains the same.

Working with Commercial Data in the Publishing Web UI

Commercial data (commercial terms lists) may be imported, viewed, and edited in the Publishing Web UI.

This is accomplished by adding the **Commercial Terms Editor** component to the Node Editor for publication objects. Available as a Node Editor child component, the Commercial Terms Editor is intended to use only on Node Editor configurations used to work with publication objects.

Publication | English US | Main

Publications > Flatplanner Publications > Acme Party Supplies

Reset | Save | Delete | Import Commercial Terms

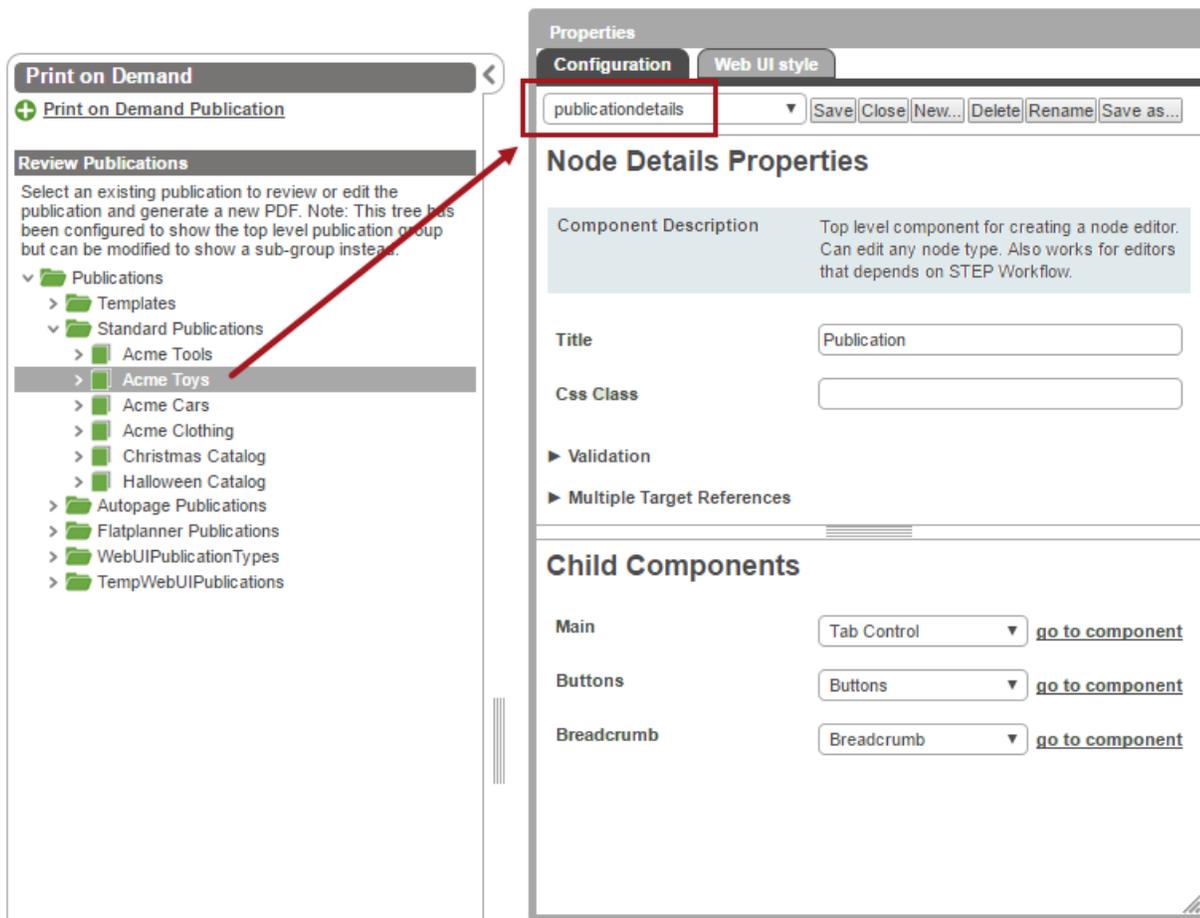

Visible term fields for commercial data lists in the Web UI are the same as those in the workbench: Value, Unit, Min Quantity, Max Quantity, Start Date, and End Date.

The following sections of this topic explain how to configure, import, and edit commercial data terms lists in the Publishing Web UI.

Configuring the Commercial Data Component in Web UI

Follow these steps to configure the commercial data terms lists component in the Publishing Web UI:

1. In your Publishing Web UI, navigate to a publication object in the publication hierarchy.
2. With the publication object selected, enter design mode.
3. In the dropdown list that appears in the upper left corner of the Web UI Designer, the screen ID for the Node Details screen created for publication objects should already be selected. In this example, this screen is named **publicationdetails**.

4. In Child Components > Main, ensure that **Tab Control** is selected. Click 'go to component.' The Tab Control component appears in the designer.
5. Under Child Components > Tab Pages, click **Add**.

Commercial Terms Editor

Component Description A screen for viewing and editing Commercial Terms Lists for a Publication

Commercial List Object Types

Valid Units

Show Unit Header

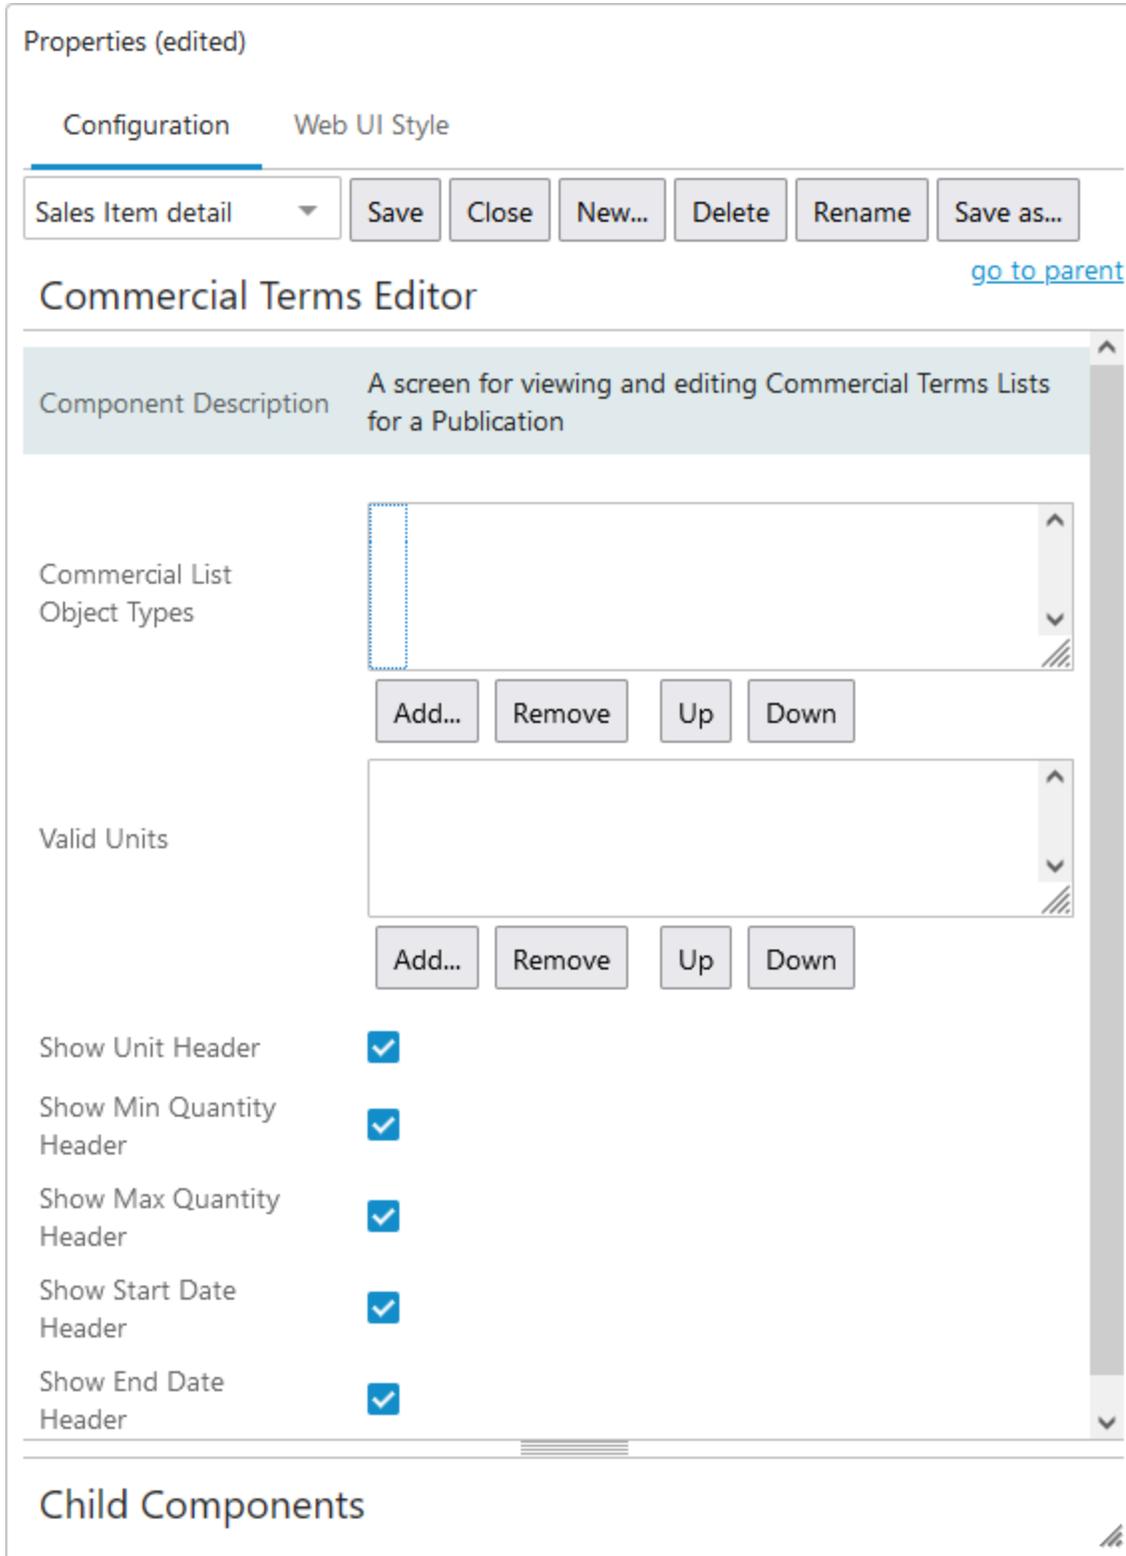

Show Min Quantity Header

Show Max Quantity Header

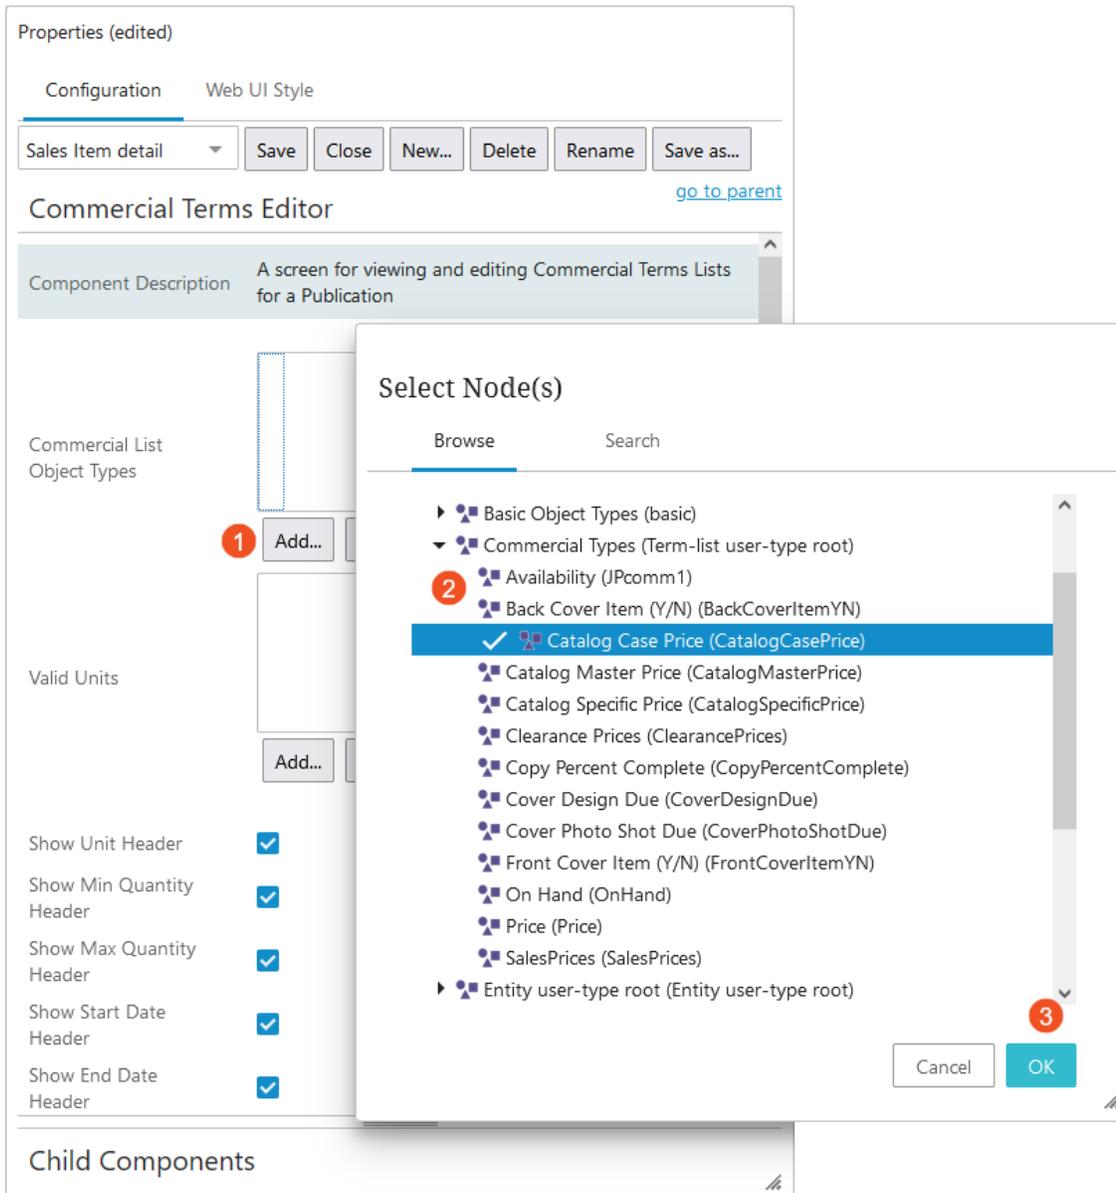

Show Start Date Header

Show End Date Header

Child Components

13. Click the **Add** button in the **Commercial List Object Types** section. The **Select Node(s)** dialog displays.
14. Select the commercial data object type(s) that should be valid in the commercial terms editor. Multiple commercial types may be selected at once by pressing Ctrl or Shift while making selections. Click **OK** when finished.

15. Click the **Add** button in the **Valid Units** section. The **Select Node(s)** dialog displays.

16. Select the unit(s) that should be valid in the commercial terms editor. Multiple units may be selected at once by pressing Ctrl or Shift while making selections. Click **OK** when finished. (Units used in commercial data are typically currency units.)

The screenshot displays the 'Commercial Terms Editor' interface. At the top, there are tabs for 'Configuration' and 'Web UI Style', and a dropdown menu set to 'Sales Item detail'. Below this are buttons for 'Save', 'Close', 'New...', 'Delete', 'Rename', and 'Save as...'. The main area is titled 'Commercial Terms Editor' and contains a 'Component Description' field with the text 'A screen for viewing and editing Commercial Terms Lists for a Publication'. Below this is a list of 'Commercial List Object Types' including 'Availability', 'Back Cover Item (Y/N)', 'Catalog Case Price', 'Catalog Master Price', 'Catalog Specific Price', and 'Clearance Prices'. There are 'Add...', 'Remove', 'Up', and 'Down' buttons for this list. The 'Valid Units' section is currently empty, with an 'Add...' button marked with a red circle '1'. A 'Select Node(s)' dialog box is open, showing a tree view of units. The 'Currency (Currency)' node is expanded, and '\$ (iso4217.unit.USD)' is selected and highlighted with a blue background, marked with a red circle '2'. Other units listed include 'Acoustics (Acoustics)', 'Angle (Angle)', 'Area (Area)', 'Computers (Computers)', '€ (iso4217.unit.EUR)', '£ (iso4217.unit.GBP)', '¥ (iso4217.unit.JPY)', 'eClass acceleration (eClass_BAJ271001)', and 'eClass areic energy flow (eClass_BAJ322001)'. The dialog box has 'Cancel' and 'OK' buttons at the bottom, with the 'OK' button marked with a red circle '3'.

- Check the relevant boxes beneath the Valid Units area to configure which headers should display in the commercial data table on the Commercial Terms Editor screen.

ID	Value	Unit	Min Quantity	Max Quantity	Start Date	End Date
----	-------	------	--------------	--------------	------------	----------

- Click the **Save** and **Close** buttons at the top of the designer to save your configurations and close the designer.

Importing Commercial Data in Web UI

Commercial data may be imported in the Web UI by using Excel spreadsheets containing the commercial terms information for products in the selected publication.

Note: Before commercial data can be imported into a publication in the Web UI, at least one import configuration for commercial data must have already been created on the publication in the workbench.

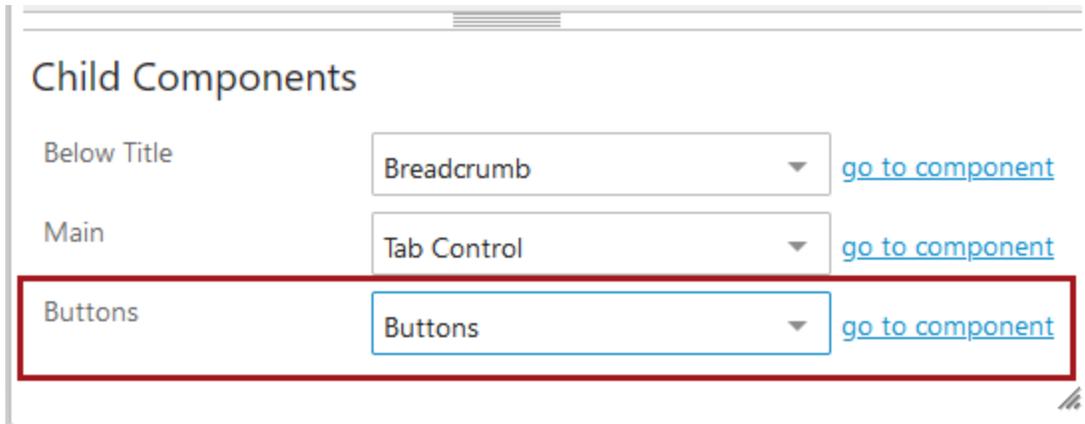

- Refer to the Defining Import Settings for Commercial Data topic in the Publisher (Adobe InDesign Integration) documentation for information on how to configure import configurations for commercial data in the workbench.

The import process is accomplished by using the **Import Commercial Terms** button on the **Publication Node Editor** screen.

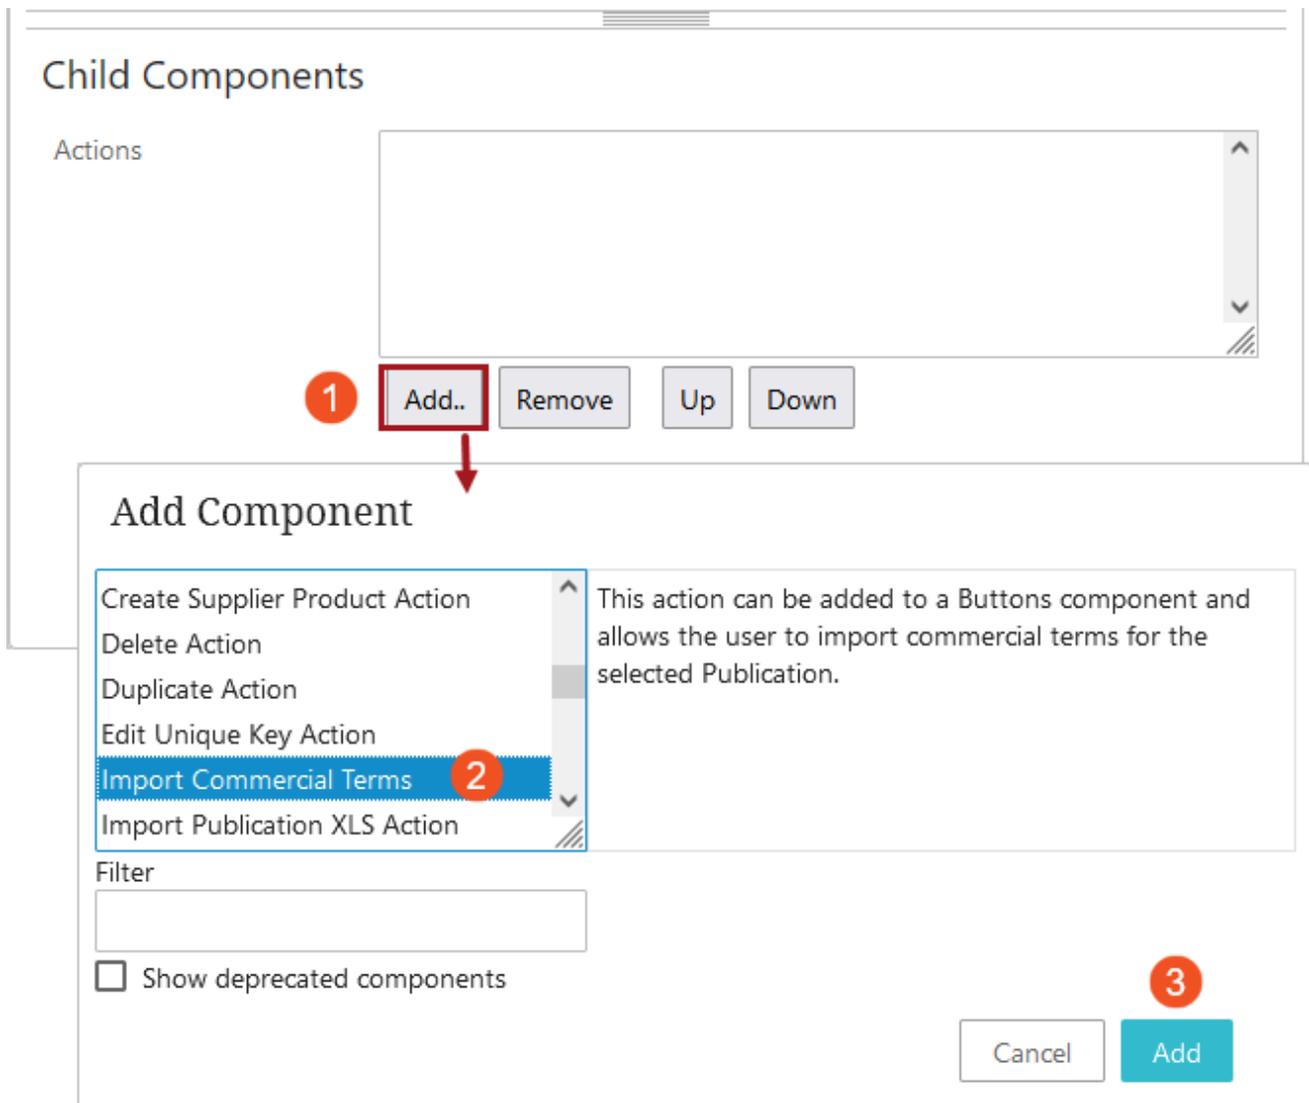

To add this button to your screen, follow these steps:

- Navigate to **Node Details Properties** in the designer by following steps 1 - 3 in the previous section of this topic.
- In the **Child Components** section, select **Buttons** in the Buttons dropdown list, then click 'go to component.'

3. The **Buttons Properties** component displays in the designer. In the **Child Components** area, click the **Add** button. In the **Add component** dialog that displays, select **Import Commercial Terms** from the dropdown list. Click **Add** to close the dialog.

4. Click the **Save** and **Close** buttons at the top of the designer to save your configurations and exit design mode.
5. The **Import Commercial Terms** button is now added at the bottom of the screen.

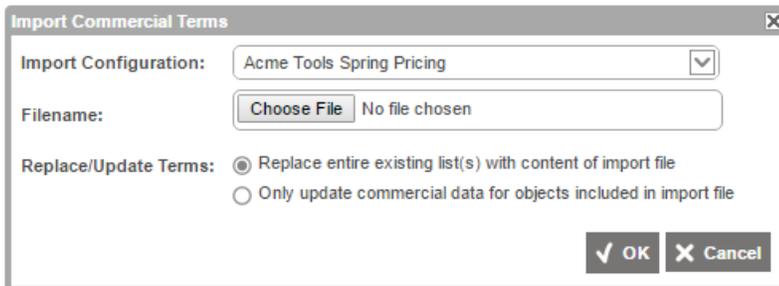

Note: The Import Commercial Terms button is not activated unless you have selected a publication in the Tree area that has at least one import configuration already defined in the workbench.

Importing the Commercial Data Spreadsheet

Follow these steps to import a spreadsheet containing your commercial terms information:

1. In the Tree area, navigate to the publication into which you would like to import your commercial terms spreadsheet, then navigate to the Commercial Data tab on the **Publication Node Editor** screen.
2. Click the **Import Commercial Terms** button. The **Import Commercial Terms** dialog displays.

3. If the publication has multiple import configurations, select the relevant configuration from the **Import Configuration** dropdown list.
4. Click the **Choose File** button to select the spreadsheet that you would like to import.
5. Select 'Replace entire existing list(s) with content of import file' to remove all contents of the existing list and replace those terms with the contents of the new sheet. Select 'Only update commercial data for objects included in import file' to add new terms and overwrite existing terms for products already on the list.
6. Click **OK** to close the dialog. A background process begins for the commercial terms list import.
7. When the background process successfully completes, the commercial terms are added to the commercial list.

Editing Commercial Data in Web UI

Once commercial terms have been imported into the commercial data list(s) connected to your publication, both the terms values and configurations of the lists themselves can be edited in the Web UI.

To edit configurations for commercial terms lists in the Web UI, follow these steps:

1. In the Tree area, navigate to the publication that contains the commercial terms that you would like to edit.
2. Navigate to the Commercial Data tab on the **Publication Node Editor** screen, then select the relevant commercial data terms list from the **Select Commercial List** dropdown. The **ID** and the **Object Type** of the list will automatically display.

Publication

[Publications](#) > [Standard Publications](#) > Acme Tools

[Details](#)
[Proof](#)
[Plan](#)
[Print On Demand](#)
[Commercial Data](#)

Select Commercial List:

ID: AcmeToolsSpringPricing

Object Type: Price

Default Unit:

Default Start Date:

Default End Date:

Expiry Date:

Immutable:

- In the **Default Unit** field, choose the default unit from the dropdown list. (This list is populated by the valid units that were selected when the **Commercial Terms Editor Properties** screen in the Web UI designer was configured.)
- For **Default Start Date**, **Default End Date**, and **Expiry Date**, either click in the field and select a date from the popup date picker or manually enter a date that matches the 'ISO Date and Time' format of **yyyy-MM-dd HH:mm:ss**.
- Check the **Immutable** box to make the values of the terms list cannot be edited by any user.

Editing Terms

To edit the values of terms lists, follow these steps:

- Click the node picker button to the right of the **Product** (product search) field to locate a product in your commercial list.

Product:

ID	Value	Unit	Min
----	-------	------	-----

- In the **Select Product** dialog that displays, either browse to or search for the relevant product, then click **OK**. Note that only one product at a time may be selected.
- The product displays in the commercial data table.

Product: Torque wrench (42304)

	ID	Value	Unit	Min Quantity	Max Quantity	Start Date	End Date
Torque wrench	42304	101.99		1	3		

- Contents of the **Value**, **Min Quantity**, and **Max Quantity** fields are typed. The value for **Unit** is chosen from a dropdown list (which contains the valid units that were selected when the **Commercial Terms Editor Properties** screen in the Web UI designer was configured).

The values for **Start Date** and **End Date** can be typed or chosen from a date picker. To view a sample of the required ISO format for the date field(s), select the field and double click. To access the date picker, select the field and triple click.

- To add an additional term for the product, click the add terms icon. An additional term may be needed, for example, to add an additional price for a price break.

Product: Torque wrench (42304)

	ID	Value	Unit	Min Quantity	Max Quantity
Torque wrench	42304	101.99	\$ (iso4217.unit.USD)	1	3
Torque wrench	42304	89.99	\$ (iso4217.unit.USD)	4	11

- To remove terms, select the row(s) containing the unwanted term(s), then click the remove terms icon. Rows may be multi-selected either by pressing Ctrl or Shift while making selections or by checking the 'select all' icon in the upper left (to the left of the product search field).

Product: Torque wrench (42304)

	ID	Value	Unit	
Torque wrench	42304	101.99	\$ (iso4217.unit.USD)	1
Torque wrench	42304	89.99	\$ (iso4217.unit.USD)	4

- Click the **Save** button at the bottom of the screen to save all changes. Automatic saving while performing edits of commercial terms is not possible in the Web UI.

Limitations and Considerations

- Terms may be viewed and edited for only one product at a time in the Web UI.
- The toolbar is not configurable. Select / deselect all, product search, and add / remove terms are always shown.

Additional Information

For information on how to configure import configurations for commercial data in the workbench, refer to the Defining Import Settings for Commercial Data in the Publisher (Adobe InDesign Integration) documentation.

For general information on commercial data in STEP, refer to the Commercial Data topic of the Publisher (Adobe InDesign Integration) documentation.
